Building 3, South San Francisco

LEED-NC GOLD - Confidential Client  
Central Receiving Warehouse

LEED-NC GOLD - The Harker School  
Nichols Hall, San Jose

# Because Excellence Matters Green

## Because Green Matters

XL Construction is dedicated to promoting green building practices. We have created a "Best Practices" manual for green projects and a "Green Best Practices" guide for use on all our job sites, not just our LEED (Leadership in Energy and Environmental Design) projects. The guide includes minimum requirements for waste diversions from landfills, easy to use indoor air quality plans, guidelines for purchasing recycled and low VOC-emitting materials, a reference matrix from our in-house MEP group to help in selecting the most efficient MEP and HVAC equipment, and other excellent tools for "greening" our projects.

XL Construction's commitment to sustainable practices goes beyond our projects and is about making smart choices in our corporate lifestyle. XL's corporate headquarters is a LEED-CI Silver certified building and received an Award of Excellence in the Adaptive Reuse/Renovation Design category at the AIA Santa Clara Valley Design Awards.

To learn how LEED principles can benefit your project, call and schedule an appointment; we would love to show you how easy it is to be green.

## The XL Advantage

- XL Construction administers the LEED process on 80 percent of our LEED projects.
- Last year, XL completed more than \$40 million and 135,000 square feet of LEED projects.
- Last year, 25 percent of our revenue was from LEED registered projects.
- More than half of XL's professional staff are LEED Accredited Professionals.
- XL has worked on one-quarter million square feet of LEED projects.
